## DETAILED ACTION

### *Election/Restrictions*

1. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. ***Claims 1-6 are drawn to "operator interface: remote operation of computing device", classified in class 345, subclass 740.***
  - II. ***Claims 7-18 and 20-27 are drawn to "distributed data processing: client/server", classified in class 709, subclass 203.***
  - III. ***Claims 19, 30, 38 and 47 are drawn to "electronic negotiation", classified in class 705, subclass 80.***
  - IV. ***Claims 28-29 and 31-36 are drawn to "interprogram communication using message: object oriented message", classified in class 719, subclass 315.***
  - V. ***Claims 37 and 39-40 are drawn to "multicomputer data transferring: computer-to-computer protocol implementing", classified in class 709, subclass 230.***
  - VI. ***Claims 41-46 are drawn to "operator interface: interface customization or adaptation", classified in class 345, subclass 744.***
  - VII. ***Claims 48-67 are drawn to "remote data accessing: accessing a remote server", classified in class 709, subclass 219.***

VIII. *Claims 68-83 are drawn to "software program development tool: managing software components", classified in class 717, subclass 120.*

IX. *Claims 84-89 are drawn to "software program development tool: linking: object oriented", classified in class 717, subclass 165.*

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of Group I is related as combination and subcombinations of Groups II-IX.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (Group I) as claimed does not require the particulars of the subcombinations (Groups II-IX) as claimed because to both subcombinations and combination are presented and assumed to be patentable. The omission of specific details of the subcombinations as recited in *claims 7-89*, in the combination as recited in *claims 1-6* is evidence that the patentability of the combination does not rely on the details of the specific subcombinations. The subcombinations of **Groups II-IX have separate utility such as distributed data processing: client/server, electronic negotiation, interprogram communication using message: object oriented message, multicomputer data transferring: computer-to-computer protocol implementing, operator interface: interface customization or adaptation, remote data accessing: accessing a remote server, software program development tool: managing software components, and software program development tool: linking: object oriented.**

4. Inventions of the Groups II-IX are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if

Art Unit: 2143

they are shown to be separately usable. In the instant case, inventions of **Groups II-IX** have separate utility such as distributed data processing: client/server, electronic negotiation, interprogram communication using message: object oriented message, multicomputer data transferring: computer-to-computer protocol implementing, operator interface: interface customization or adaptation, remote data accessing: accessing a remote server, software program development tool: managing software components, and software program development tool: linking: object oriented. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and the search required a separate status in the art as shown by their different classification, the search required for one Group is not required for other Groups, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include and election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS ACTION IS SET TO EXPIRE THIRTY DAYS FROM THE MAILING DATE OF THIS COMMUNICATION. FAILURE TO RESPOND WITHIN THE PERIOD FRO RESPONSE WILL CAUSE THE

APPLICATION TO BECOME ABANDONED (35 U.S.C. § 133). EXTENSIONS OF TIME  
MAY BE OBTAINED UNDER PROVISIONS OF 37 CRF 1.136 (A).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas Duong whose telephone number is 703/305-1886. The examiner can normally be reached on M-F 7:30AM - 4:00PM.
